Project Design Phase-II Technology Stack (Architecture & Stack)

| Date | 31 October 2022 | |
|---------------|------------------------------|--|
| Team ID | PNT2022TMID20884 | |
| Project Name | Fertilizers Recommendation | |
| | SystemFor Disease Prediction | |
| Maximum Marks | 4 Marks | |

Technical Architecture:

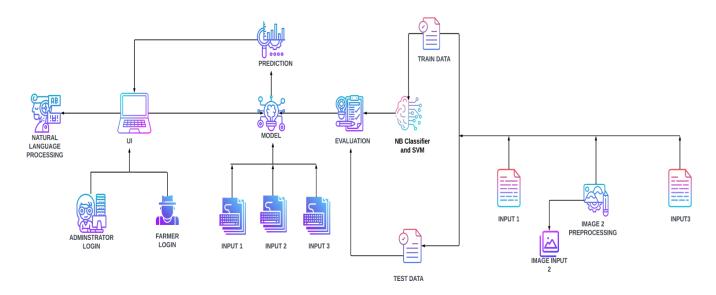

Table-1: Components & Technologies

| S.N o | Component | Description | Technology |
|----------|---------------------|--|---------------|
| 1. | User Interface | How the user interacts with the application .To depict the human-computer interaction and communication. | HTML, CSS,JSP |
| 2. | Application Logic-1 | A page to upload images as input | Python |

| 3. | Application Logic-2 | To use the MachineLearning model and predicting the result | Python |
|----|--------------------------|---|------------------------------------|
| 4. | Database | Structured data-images | MySql |
| 5. | Cloud Database | Database that typically runs on a cloud computing platform and accessto the database is provided as-a-service | IBM Cloud Databases forMySQL |
| 6. | File Storage | To store data in a hierarchicalstructure | Local File system |
| 7. | Machine LearningModel | Here, we use a Support VectorMachine Algorithm that is usedwidely in Classification and Regression problems. | Random Forest ,XGBoost |

Table-2: Application Characteristics:

| S.No | Characteristics | Description | Technology |
|------|-------------------------------|--|--|
| 1. | Open- Source Frameworks | Flask micro web framework | Written in Python.It is classified as amicro frame work because it does not requireparticular tools or libraries. It has nodatabase abstraction layer, form validation, orany other components where preexisting third-party libraries provide common functions. |
| 2. | Security Implementations | With all aspects of the job, including detecting malicious attacks, analyzing the network endpoint protection and vulnerability assessment, Sign in encryption | IBM Cloud App IDServices |

| 3. | Availability | Available for all data size | - |
|----|--------------|--|------------------|
| 4. | Performance | Can extend the storage accordingto our needs | Python,AngularJS |
